PANT FITS DEFINED

Every detail of your ensemble is important, including the break in your pants. Use this guide to help you achieve your preferred look.

How To Order:

Refer to the Measuring Techniques on page 76 for instructions to measure a pant outseam. When ordering, deduct the recommended number of inches as shown above from the actual pant outseam measurement to achieve desired break.

NOTE: See page 74 for information about Pant Fits

MEASURING TECHNIQUES

NO LOOSE MEASUREMENTS OR FINGERS UNDER THE MEASURING TAPE

Always record the customer's height & weight, as well as his fit preference (regular or tighter fit)

Ask the customer to move his arms outward. Place the tape under his arms and around the broadest part of his chest. Have the customer lower his arms to his side and relax. **Stand** to the side of the customer to ensure the tape is level on both sides. Pull the tape until you feel tension and then record your measurement.

With the customer's arms at his side, place the tape around the broadest part of the chest and arms. Stand to the side of the customer to ensure the tape is level on both sides. Pull the tape until you feel tension and then record your

Place tape around neck at the level where the shirt's collar would be buttoned. Add 1" to the measurement for the correct neck size. In the example above, a 15.5" neck measurement was taken, so a 16.5" neck size would be recorded.

Ask the customer to remove any items from his pockets. Stand to the side of the customer and place the tape around the broadest part of his hip and rear. Pull the tape until you feel tension and record your measurement.

PANT WAIST

Place the tape around customer's waist at the level he wears his pants, preferably an inch below his navel. **Pull the tape** until you feel tension and record your measurement. The customer's hip measurement minus 6 inches informs us that they cannot wear a waist smaller than that number. Example: 40" hip minus 6" = 34" waist; this customer could not wear a 32" waist pant. Record the larger size, is no pant break preference.

Place the tape around the widest part of the customer's stomach. This measurement helps determine the proper shirt and coat size for the customer. **DO NOT** RECORD AS THE WAIST MEASUREMENT.

1 Start the tape at the base of the neck centered with the spine. Make sure the tape measure goes over the top of the customer's shoulder. 2 Take the tape down the arm to the point of their elbow 3 and then measure an inch past the wrist bone. It is always better to measure long versus short because a sleeve that is too short will likely be unacceptable to your customer.
